**MADE IN JAPAN**

Tongue  
cleaner

Children's  
toothbrush

Interdental  
brush

## Issues with electric toothbrush:

- Product may perform well but expensive
- Dedicated spare brush is not widely available
- Spare brush price is way too expensive
- Difficult or almost impossible to find the ideal/best brush design for every individual oral care needs, this is due to limited selection of brushfilament material, size, softness, etc.

## Issues with normal toothbrush:

- They require trained-skill to remove plaque from the gap between teeth and gum.
- Requires more time (10minutes recommended by dentist) to complete proper teeth-brushing with manual operation.
