

【ソニックオール】

sonicall®

Sonic driver for toothbrush

Strongly recommended
by dentists and oral care specialists
for the effectiveness to prevent gum diseases.

① Complaints about conventional electric toothbrush

- Product may perform well but expensive to buy
- Dedicated spare brush is not widely available at grocery stores
- Spare brush price is way too expensive
- Difficult or almost impossible to find the ideal/best brush design for every individual oral care needs. It is due to limited selection of brush filament material, size, softness, etc.

② Issues with normal toothbrush

- It requires trained-skill to efficiently remove plaque from the gap between teeth and gum.
- Requires more time (10minutes recommended by dentist) to complete proper teeth-brushing with manual operation.

③ **Solution** : Our exclusive toothbrush Sonic Driver

Sonicall combines the benefit of both manual hand brushing and electric toothbrush to give you an ideal solution.

- Co-Developed with dentists and produced in Japan.
- High performance (24,000 strokes/min).
- Accommodate most of the toothbrushes and convert them into sonic-vibration toothbrush in seconds.
- Affordably priced so that anyone can get one for yourself, family and friends, etc.
- Operates with AAA battery and could last for 2 months. Ideal for home-use and as a travel companion.
- All family can use their favorite toothbrush and turn it into electric toothbrush with one sonicall.

We provide the best solution for you, from Japan.
